## DETAILED ACTION

### ***Election/Restriction***

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
  - I. Claims 16-20, drawn to an anti fuse device, classified in class 257, subclass 530 and wherein:
  - II. Claims 1-15, drawn to a method of making an anti fuse device, classified in class 438, subclass +1.
2. The inventions are distinct, each from the other because of the following reasons:  
Inventions II and I are related as process of making and product made. The inventions are distinct if either or both of the following can be shown: (1) that the process as claimed can be used to make other and materially different product or (2) that the product as claimed can be made by another and materially different process (MPEP § 806.05(f)). In the instant case unpatentability of the Group I invention would not necessarily imply unpatentability of the Group II invention, since the product of the Group I invention could be made by another materially different process from that of the Group II invention. For instance, as an alternative of claim 1, rather than forming a layer of second semiconductor material on the layer of insulation material, the first region and the second region and etching the layer of second semiconductor conduction material to form a first section and a second section, *selectively depositing a layer of second semiconductor material on the layer of insulation material, the first region and the second region to form a first section and a second section without etching.*

3. Because these inventions are distinct for the reasons given above, the inventions have acquired a separate status in the art because of their recognized divergent subject matter as shown by their different classification, the search required for Group II is not required for Group I, and separate examination would be required, restriction for examination purposes as indicated is proper.

4. Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

### ***Conclusion***

5. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Joseph Nguyen whose telephone number is (703) 308-1269. The examiner can normally be reached on Monday-Friday, 7:30am-4:30pm.
